

## How you can help

Gifts at any level to the Prince Philip Fund can make a difference:

**£100**

from 10 donors could help *This is Engineering* to achieve 30,000 film views, enabling us to reach more teenagers and their influencers.

**£500**

from 20 donors could help towards providing vital training, mentoring and networking opportunities for enterprising innovators through the Africa Prize.

**£2,500**

from four donors could pay towards generating vital exposure for our African entrepreneurs through the annual Africa Prize live event, facilitating connections to investors and networks, and helping pave the way for future growth.

### To make your gift:

Visit [www.raeng.org.uk/make-a-gift](http://www.raeng.org.uk/make-a-gift) or complete the enclosed gift form.

**£250**

from four donors could contribute towards educational resources and programmes, encouraging more young students into STEM.

**£1,000**

from 10 donors could enable our Hub entrepreneurs to showcase their innovations and provide crucial pitching opportunities to UK and international investors.

**£5,000**

from two donors could help provide much needed funds for the Hub to deliver a mentoring programme for women founders, increasing their chances of winning a place on our Enterprise Fellowships programme.

## 2023 Annual Appeal

## Help us bring the power of engineering to life

Our strategy and our plans are ambitious; the complexity of the engineering challenges we face today demand such an approach. With your help, we can continue to bring together the most talented engineers, promote excellence in engineering, and deliver tangible, meaningful benefits for the whole of society.

[www.raeng.org.uk/make-a-gift](http://www.raeng.org.uk/make-a-gift)

The **Prince Philip Fund**, named in honour of our late Founding Senior Fellow HRH The Duke of Edinburgh, enables us to invest much-needed flexible funding into our programmes that rely on philanthropic support. The fund will underpin our work for decades to come, helping the Academy to increase diversity in engineering, inspire the next generation of engineers, drive innovation and put engineering expertise at the heart of decision-making – **your support is vital to our success.**

“ Much of the Academy’s impact comes from our ability to generate new collaborations and inspire new thinking. The progress we are seeing confirms that our ambition is paying off, thanks to the determination and commitment of the entire Academy community.”  
Professor Sir Jim McDonald FREng FRSE, President

## Supporting groundbreaking ideas across Africa

The Africa Prize for Engineering Innovation is Africa’s biggest prize dedicated to supporting and upscaling engineering that tackle local challenges.

Your donation will help us continue providing invaluable support and training to the continent’s brightest engineering entrepreneurs, like Anatoli.

**£500**  
from 20 donors could help provide vital training, mentoring and networking opportunities for enterprising innovators through the Africa Prize.

“ The prize money will allow us to add more than 1,000 households to the YUNGA network, with a focus on women-led homes, which are more vulnerable to crime in low-resource settings. This is an invaluable opportunity in our efforts to scale up.”

Anatoli Kirgwajjo, joint 2023 winner, founder of YUNGA, a local digital security network with a community ‘panic button’ inspired by traditional African warning drums.

## WILL YOU HELP US?

With your donations to the Prince Philip Fund, the Academy will be a catalyst for programmes and activities like these:

### Building a truly inclusive engineering workforce

We work to increase the diversity, quality and quantity of young engineers in the UK by addressing the engineering skills challenge across all stages of education.

**28%**

of young people aged 18 to 24 think engineering is for men!

**£100**

from 10 donors could help **This is Engineering** achieve 30,000 film views, reaching more teenagers and their influencers.

#### By donating, you will enable us to continue:

- promoting engineering excellence
- providing STEM experiences to students
- training teachers
- encouraging more students from all backgrounds to take up engineering as a career through our *This is Engineering* campaign.

“ I think it was empowering, because it was something from the profession that says, ‘yes, you can, and yes, you belong’, which I hadn’t had... It’s an incredible experience, and it really gives you motivation.”

Rebecca Wooding, Project Manager at Arcadis and past recipient of the Academy’s Engineering Leaders Scholarship.

## Championing an ecosystem of changemakers

Through our Enterprise Hub, we champion a bigger, more resilient and more diverse network of engineering innovators, helping entrepreneurs develop the connections, insights, commercial awareness and leadership skills to turn ideas into groundbreaking success.

**By being a part of an ecosystem of changemakers, their innovations will help address some of society’s most pressing challenges.**

“ The Enterprise Hub is the best accelerator [and] gave me knowledge, experience and connections. It was a head start in converting my academic research into a business that provides tools for sustainable and efficient chemical manufacturing.”

Dr Nikolay Cherkasov, Founder at Stoli Chem, Enterprise Fellow and Enterprise Hub member.

**The Enterprise Hub celebrated its 10<sup>th</sup> anniversary this year.**

Nearly 6,000 jobs have been created by over 250 Hub members.
