

Activity sheet 1

'Sustainability' is a word we hear a lot. But what does it mean?
How can we be more sustainable - and how can industry help?

1a. Write down some examples of what it means to 'be sustainable':

1b. Use your ideas to write your own definition of sustainability:

1c. How can an engineering or manufacturing company be more sustainable?

Activity sheet 2

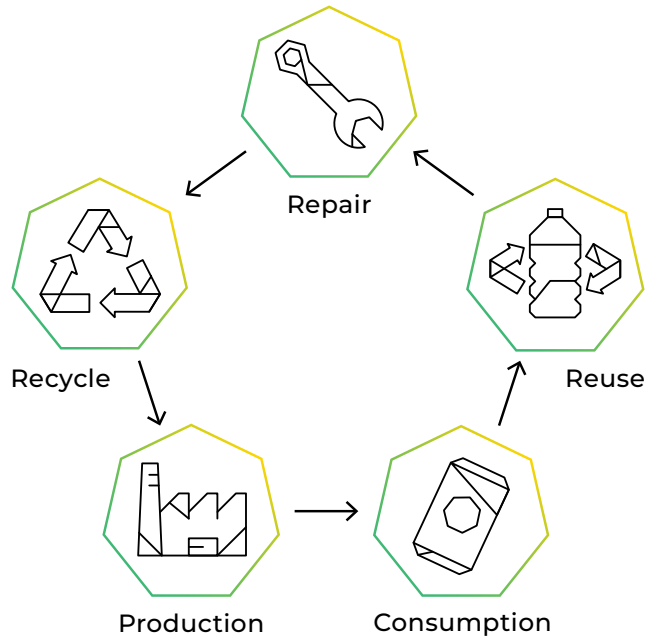

A circular economy cycles materials, reducing waste and carbon emissions. How could the 6Rs turn a favourite product into a circular economy?

Rethink:
